Belamri Yie

Front end developer

Hey there! I'm a passionate front-end developer who loves to bring designs to life. For over four years, I've been blending HTML, CSS/SCSS, Tailwind CSS, and JavaScript with a dash of React and Next.js magic, creating interactive masterpieces. Recently, I've expanded my palette with React Native, enhancing my knack for mobile app development and UI speed.

My creative journey has taken me through diverse projects in Poland and Pakistan and onto the freelancing adventure land of Upwork. Each collaboration has been a dance of creativity and learning, allowing me to leave my unique digital fingerprint and elevate user experiences.

Beyond the world of code, I'm fiercely competitive and driven by a relentless pursuit of excellence and knowledge. My journey is a symphony of development, where every note is a line of code, every rest is a meticulous test with Jest, and every crescendo is a seamless collaboration through Git/GitHub and Bitbucket.

Experience

Frontend Developer / Project Lead

MISS SAVAGE SPÓŁKA Z OGRANICZONĄ ODPOWIEDZIALNOŚCIĄ · Full-time
Jul 2023 - Sept 2023

I created the frontend and also lead the project, I had the responsibility to find other professionals to collaborate on the project, including backend developers and designers. This strengthened my technical, and communicative skills.

Frontend Developer

Upwork · Freelance
Aug 2022 - Present

I created frontend projects for different clients. This increased my time management, communication and technical skills.

Frontend Developer

Metridash · Full-time
Mar 2023 - Jul 2023

As my first job, I established a strong collaborative foundation creating websites using Next JS and React Native.
